

Mandatory Language for Monitoring and Reporting Violation
SURFACE WATER MONITORING, ROUTINE MAJOR

The **Possum Kingdom WSC**, PWS ID **TX1820076**, has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems that treat surface water and/or ground water under the direct influence of surface water are required to submit monthly operating reports with operational data of the treatment, disinfection and quality of the water provided to their customers.

We failed to monitor and/or report the following constituents daily combined filter effluent NTU at certain time intervals throughout the day.

This/These violation(s) occurred in the monitoring period(s) October 2024

Results of regular monitoring are an indicator of whether or not your drinking water is safe. We did not complete all monitoring and/or reporting for surface water constituents, and therefore TCEQ cannot be sure of the safety of your drinking water during that time.

We are taking the following actions to address this issue:

Since October 22, 2024, the correct actions and equipment have been put in place to monitor NTU data accurately and at the appropriate time intervals. All data has been recorded and submitted since then as required by TCEQ.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact Possum Kingdom WSC at (940) 779-3100.
